DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-7, 10-14, 16-20, 23-27, 29-33, and 36-39 are allowed.
2. The following is an examiner's statement of reasons for allowance: The client first makes a request for an object. An adaptive agent on the client intercepts and delays the client request. The adaptive agent then issues its own network request, across the network connection, to the calibrated object library on the server, for an object of a pre-known size and properties. Once requested, the requested object is obtained/transmitted back to the adaptive agent across the network connection. The adaptive agent determines the speed of the network, which is based on a measurement of the round-trip response time calculated from the transmitting of the request for the object to completion of obtaining the object from across the network connection.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
